Spring Bulletin

Macro invertebrates

Macroinvertebrate samples collected for analysis and identification are well underway. The field team has contributed countless hours into identifying nearly 4000 bugs. That is incredible when these invertebrates are smaller than a grain of sand.

Well done field team!

UNB Training

This three day training gave our Field Technicians capacity with fish tagging, fish dissection for parasite analysis, and GIS.

We are looking for summer students!

As summer is just around the corner and with a very busy field season, we will much appreciate the addition of summer students. If you're interested, see the details below!

Application deadline is: April 22nd, 2022 12:00PM (Atlantic Time)

Please send your resume to Jodi Macintosh at: jodimacintosh@anqotum.ca

Natoaganeg Ice Safety

Taylor Colford, Anqotum Field Technician participated in an Ice Safety Course hosted by Natoaganeg First Nation. Ice formation, types of ice, and factors of ice strength are just some of the many subjects learned in this course. This is an essential training for any organization doing winter fieldwork outdoors.

Bridge Artwork - Update

Consultation with Elders and Youth have been completed. Artwork is finalized. Stay tuned to our Facebook Page for an official unveiling of these beautiful pieces that will be installed on the new bridge replacing Anderson Bridge!
