Community Maps to the Communities

Anqotum has delivered community maps developed for our Mi'kmaq First Nations in New Brunswick. Thanks to Nelson Cloud for making these deliveries to the chiefs!

Promoting Lifelong Learning - Virtual Learning

Anqotum has delivered and will continue its delivery of our Promoting Lifelong Learning program, where we promote and teach our First Nation children practices of conservation and stewardship.

Exciting videos are always being created for the betterment of our program, to enhance the learning capabilities and enjoyment of our stewards in the Mi'kmaq run schools of New Brunswick.

It is vital to teach our younger generation the importance of species at risk and future risks to the environment and our Mi'kmaq people.

Plans are on-going for the delivery of this project with new and efficient ways to communicate the importance of our curriculum.

Anderson Bridge Replacement - Artwork Design and Installation

The new bridge, which will be replacing the existing Anderson Bridge, is well underway. Through the Department of Transportation and Mi'gmawe'l Tplutaqnn Inc., Anqotum has a very special project to include in the design of this bridge. This includes the installation of 12 artwork designs to be embossed into concrete.

To the left, the Atlantic Salmon, is just one of the many to be included.

Stay tuned for this exciting venture!
